Our Remote Operating Station (ROS) is a multifunctional electronic desk that can show camera views of your crane's operating environment as well as related information. It allows your crane to be operated from a control room away from the crane operating area, without a direct line of sight to the crane.

Remote Operating Station for Metals ... - konecranes.com

Petrochemical plants running coker operations are fertile ground for crane automation. While full automation is still on the horizon at most plants, the semi-automated coker cranes built by Konecranes come standard with a PLC, modern D2 inverter controls and signal cables- virtually everything needed to convert to full automation (or remote operation) in the future.
