### Mathematics archaeology | Archaeological science ...

Archaeology is a meticulous and exacting profession where extensive math skills are employed on a daily basis. As it is a destructive process in and of itself, information must be carefully recorded throughout the excavation to give context to artifacts and features uncovered, and to help archaeologists tell the complete story of their findings.

### The Mathematics of Archaeology

Mind and matter, or how to look for the origins of mathematics. In Colin Renfrew's definition (Reference Renfrew, Renfrew and Zubrow 1994, 3), cognitive archaeology is 'the study of past ways of thought as inferred from material remains'. It might seem trivial but is actually important to note that archaeology in general starts from material remains not because it attaches special ...

The Anthropological and Mathematical Analysis of Archaeological and Zooarchaeological Evidence (AMAAZE) is an international consortium of anthropologists, mathematicians, and computer scientists who are working together to advance analytical methods and to use advanced mathematical methods to address important questions within archaeology and zooarchaeology.

### Home | AMAAZE

The earliest civilizations have left only archaeological and limited historical evidence that requires substantial interpretation. We have many mathematical treatises from the later civilizations, but these are usually in a completed form which leave out the development of the concepts and the purposes for which the mathematics was developed.

### Math 105 History of Mathematics

Computational archaeology is also known as archaeological informatics (Burenhult 2002, Huggett and Ross 2004) or archaeoinformatics (sometimes abbreviated as "AI", but not to be confused with artificial intelligence).
