The Basics Of Communication Research

Communication research can barely keep up with the ongoing changes to human communication. Researching something as complex as human communication can be an exercise in creativity, patience, and failure. Communication research, while relatively new in many respects, should follow several basic principles to be effective.

The Basics of Communication Research by Leslie A. Baxter ...

Communication involves transmission of verbal and non-verbal messages. It consists of a sender, a receiver and channel of communication. In the process of transmitting messages, the clarity of the message may be interfered or distorted by what is often referred to as barriers. Health communication seeks to increase knowledge gain.

Communication: concepts, practice and challenges | Health ...

The term communication process refers to the exchange of information (a message) between two or more people. For communication to succeed, both parties must be able to exchange information and understand each other. If the flow of information is blocked for some reason or the parties cannot make themselves understood, then communication fails.

The Basic Elements of the Communication Process

Planning is the first step for qualitative research. (Lindlof 176). You might want to study the communication of registered nurses. Obviously, the topic "the communication of registered nurses" is too large so careful planning in regards to who should be the focus of study, in what context, what research questions should be asked, etc. are all part of the initial planning of research.
